AGGREGATED DATABASE COLLECTIONS
Computers, Technology & Engineering

HIGHLIGHTS

- Growing online collection of over 1,000 full-text, searchable books, case studies and industry sector reports
- More than 40 world-class contributing publishers in this category
- 67% of titles published in past two years
- Simultaneous, multi-user access – at any time, from anywhere
- New books & case studies added at no additional cost during subscription term
- Delivered via a custom website that ebrary creates, hosts and maintains
- Integrates with existing ILS systems and digital resources
- MARC 21 records provided with link in the 856 fields directly to titles
- Advanced research tools turn every word in every document into a highly interactive experience
- Reporting tools and usage statistics to ICOLC standards
- Personalized bookshelves, highlighting, annotations and more
- PDF-based technology provides an online replica of a book’s print version

KEY CONTRIBUTING PUBLISHERS:

- CMP Media
- Elsevier Science
- Hentzenwerke
- Idea Group
- Info-Tech Research Group
- John Wiley & Sons
- McGraw-Hill Professional
- MIT Press
- Muska & Lipman
- No Starch Press
- Paraglyph Press
- Pearson Technology Group
- Redmond Technology Press
- Syngress Publishing

A COLLECTION THAT CLICKS

ebrary’s Computers, Technology & Engineering (CTE) collection appeals to a wide audience, from students in computer science, electrical engineering, and telecommunications; to employees in a corporate environment who need information about advanced topics such as programming, networking, or security; to anyone who simply is looking to use Microsoft Outlook or other software application.

Many titles in this collection are reference-oriented, and over 67% were published within the past two years. McGraw-Hill, a leading publisher in the field, is a major contributor to all levels of this collection, including advanced engineering and telecommunications titles.

Also included in the CTE collection is a series of real-world case studies, all recently published by IT publishing leader, Idea Group, which apply technology to business problems faced within the past few years. These diverse case studies may serve as the basis for teaching students in business, computer science, or engineering the long-range value and practical issues of implementing a technological solution within a business setting. The collection also includes industry sector reports from Idea Group outlining the most current trends in the business application of technology.

### Pricing

ebrary charges an affordable annual subscription based on library type and size. Discounted pricing is available through consortia and regional networks. A $2,000 institutional minimum applies.

- **Academic** – $0.90 per FTE (students)
- **Community College** – $0.60 per FTE (students)
- **Career College** – $0.60 per FTE (students)
- **Special** – $1.20 per FTE (employees/users)
- **K-12** – $0.60 per FTE (students)
- **Public** – $0.15 per FTE (cardholders)

*One-half of each of the prices set forth above represents a License Fee for customer-specific standard site set up, customer-specific MARC records, high-level functionality, second or third level customer service, and other benefits provided by ebrary. The other half represents a Content Usage Fee for access to and print/copy of electronic titles.*
