

AGGREGATED DATABASE COLLECTIONS LIFE & PHYSICAL SCIENCES

HIGHLIGHTS

- Growing online collection of over 1,800 full-text, searchable books and reports
- Covers all fields in life and physical sciences
- Simultaneous, multi-user access – at any time, from anywhere
- New books added at no additional cost during subscription term
- Delivered via a custom website that ebrary creates, hosts and maintains
- Integrates with existing ILS systems and digital resources
- MARC 21 records provided with link in the 856 fields directly to titles
- Advanced research tools turn every word in every document into a highly interactive experience
- Reporting tools and usage statistics to ICOLC standards
- Personalized bookshelves, highlighting, annotations and more
- PDF-based technology provides an online replica of a book's print version

CATEGORY STRENGTHS

- Agriculture & Food Science
- Environmental Science
- Math and Statistics
- Medicine

KEY CONTRIBUTING PUBLISHERS:

- BIOS Scientific Publishers
- Cambridge University Press
- Cold Spring Harbor Laboratory Press
- Environmental Law Institute
- Food and Agriculture Organization
- Greenwood Publishing Group
- Island Press
- McGraw-Hill
- NRC Research Press
- RAND Corporation
- Royal Society of Chemistry
- Taylor & Francis Group
- Springer-Verlag
- World Health Organization

SCIENTIFICALLY ENHANCING PHYSICAL COLLECTIONS

ebrary's Life & Physical Sciences collection embraces all fields in the natural and physical sciences, but also covers medicine and other applied life sciences, and math & statistics. Other category strengths include agriculture, food science, and environmental science.

Within the agriculture & food science category are several high-level, theoretical studies of crop and livestock development strategies and biotechnology in food manufacturing. Contributing publishers include the Food and Agriculture Organization of the United Nations, with titles ranging from specialized studies in agricultural development to its annual reports on worldwide food security.

The collection includes many titles in environmental science applicable to course work and research in climate change, conservation and protection, ecology, natural resource management, and sustainable development, but also fields in which the environment is a key factor, such as business, political science, and public health.

The offering in mathematics and statistics supports both undergraduate and graduate curricula. For students in lower-level math and statistics courses, the collection includes test

preparation and study guides from McGraw-Hill's Schaum's Outline Series. And for graduate students and research staff in technical fields, ebrary offers titles in calculus, differential equations, linear algebra, logic, number theory, and probability—many from the field's leading publisher, Springer-Verlag.

Students and researchers engaged in the study of medical ethics, public health, and technology in medicine, as well as core medical subjects such as cardiology, critical care, epidemiology, gynecology, nursing, and obstetrics, will find useful monographic and reference volumes throughout ebrary's broader Life & Physical Sciences collection.

SAMPLE TITLE LIST: LIFE & PHYSICAL SCIENCES

For a complete title list please contact an ebrary sales representative.

Livestock Development: A Strategy Paper for the World Bank	C. de Haan	The World Bank	2001
Ecological Management of Agricultural Weeds	Matt Liebman	Cambridge University Press	2001
Food: A Dictionary of Literal and Nonliteral Terms	Robert A. Palmatier	Greenwood Publishing Group	2000
Food Safety and Food Quality	Ronald E. Hester	Royal Society of Chemistry	2001
Repairing Damaged Wildlands: A Process-Oriented, Landscape-Scale Approach	S. Whisenant	Cambridge University Press	1999
Key Topics in Critical Care	Tim Craft	BIOS Scientific Publishers	1999
Nature's Services: Societal Dependence on Natural Ecosystems	Gretchen C. Daily	Island Press	1997
Logic From A to Z: The Routledge Encyclopedia of Philosophy Glossary of Logical & Mathematical Terms	Bacon et al	Routledge	1999
The World Health Report 2002: Reducing Risks, Promoting Healthy Life	World Health Organization Staff	World Health Organization	2001
Schaum's Easy Outline of Probability and Statistics	Murray R. Spiegel	McGraw-Hill	2002
