

# Usage Reports

ebrary reports provide valuable information about how our collections are being used while protecting end-user privacy. Our reporting features are available on a monthly basis, and updates to the library's usage statistics are available on the 5<sup>th</sup> of each month.

Here is a brief summary of the reports that are currently available:

## 1. Site Activity by Summary

The Site Summary Activity Report measures activity on your library's ebrary site. This report allows you to select one or more subject (BISAC) categories to be included in the summary report and allows you to further summarize by calendar date, calendar month, and day of week.

Activity reports include:

1. Number of sessions
2. Documents viewed
3. Page views
4. Pages copied
5. Pages printed

## 2. Site Activity by Category Detail

This report summarizes activity on your library's channel for a time period that you select. It breaks out the activity for that period by top-level BISAC category.

Activity reported includes number of sessions, documents viewed, page views, pages copied, and pages printed. Unlike the Site Activity Summary report, this report does not allow you to break down the summary by calendar date or day of week.

From the resulting report, you can drill down to view the statistics broken out for each detailed BISAC entry within main categories.

### 3. Site Activity by Subnet

Site Activity by Subnet

The Subnet report measures activity on your library's channel by IP block (going to class C level). With this report, you can see which areas of your library/campus are using ebrary most frequently.

### 4. Title Activity Summary

The Title Activity report summarizes activity for each title accessed in the time period you select. The Title Activity Report includes the number of page views, pages printed, pages copied, and distinct user sessions accessing a specific title. This report can be exported in .xls format.
