

ebrary Launches Business Complete E-book Database

June 9, 2010 – Palo Alto, CA – Corporations across all industries and locations can now more quickly, easily and affordably access the information they need to run a successful business, both within and across departments.

ebrary®, a leading provider of digital content products and technologies, today announced the availability of Business Complete, a growing subscription database of more than 1,600 e-books covering all aspects of company operations including Accounting; Human Resources; Leadership; Marketing, Branding & Product Management; Sales & Selling; Strategic Planning; and more. Featuring current titles from leading publishers including AMACOM, Elsevier, Emerald, Kogan Page, and Wiley, the collection may be previewed at <http://site.ebrary.com/lib/businesscomplete>.

“Today’s corporations face an ever-evolving economic, social, and political landscape, and it is very difficult to keep pace with the constant flow of new information,” said Leslie Lees, ebrary’s Vice President of Content Development. “By subscribing to Business Complete, corporations can better identify, understand, and take advantage of relevant trends by accessing the latest, more authoritative e-books and other titles on business topics as well as use powerful technology that helps employees find and leverage that information productively.”

Additionally, corporations may upload and integrate their own materials such as competitive intelligence, presentations, RFPs, and documents of their choice by participating in ebrary’s pilot program for DASH! (Data Sharing, Fast), the company’s new self-publishing technology that turns documents into highly interactive databases. All DASH! documents feature the same unique research capabilities as other ebrary products, including:

- InfoTools™, which turns every word into a portal to additional information within the corporation and on the web
- Shared and personal bookshelves for easy information management and collaboration
- Easy citation sourcing when text is copied or printed

- Highlighting and annotation within documents
- Transform text to hyperlinks for easy reference to other online sources
- Multiple options for searching and navigating
- Chapter-level search results
- Works on the iPad and other web-enabled devices
- Easy integration with corporate intranets, portals, and wikis
- No Reader required with QuickView™

Additional News from ebrary and Lunch Demonstration at SLA

In a separate press release available at http://www.ebrary.com/corp/newspdf/ebrary_Aerospace.pdf, ebrary announced the availability a new subscription e-book database in Aerospace that enables engineers at aerospace, aviation, and defense companies to better design and test airplanes, satellites, and other spacecraft at less cost and shorter development time.

ebrary will be demonstrating Business Complete, Aerospace, and other e-book databases at SLA (booth #848), June 13-15 in New Orleans, LA. Additionally, ebrary is conducting a focus group on its new collections and DASH! over lunch on Monday, June 14, from 12pm to 2pm at the New Orleans Marriott at the Convention Center. To RSVP, please visit <http://www.ebrary.com/corp/inforequest/SLALunch.jsp>.

Corporations and other organizations interested in a demonstration or trial may also email sales@ebrary.com.

About ebrary (www.ebrary.com)

ebrary helps libraries, corporations, publishers, and consumers get the most out of their digital content. The company offers a growing selection of more than 170,000 digital books, handbooks, reports, maps, journals and other valuable content from over 425 of the world's leading publishers under flexible subscription, purchase, and usage-based models. Additionally, ebrary offers content services—DASH! (do-it-yourself), Software as a Service (SaaS) and licensed—for customers to cost-effectively distribute their own PDF content online.

Knowledge Unbound.

Press Release

All ebrary products and services can be integrated and delivered via a single easy-to-use interface that includes powerful tools for finding, discovering, and managing information. With ebrary InfoTools™, every word in the ebrary system is a network to other online resources of the customer's choice, extending content value while increasing end-user knowledge and efficiencies.

Founded in 1999, ebrary is privately held and is headquartered in Palo Alto, CA, USA.
