## **ebrary Selected to Conduct E-book Think Tank at ER&L**

**February 2, 2009 – Palo Alto, CA** – ebrary®, a leading provider of e-content software and services, today announced that it has been chosen to conduct the 2009 E-book Think Tank at the ER&L09 Conference, held February 9-12, 2009 in Los Angeles, CA. In addition to covering successful innovations regarding e-books and electronic content, panelists will discuss how libraries can integrate electronic content across multiple vendors and platforms. They will also address the functionalities and technologies needed to achieve cohesiveness and make content accessible and useful for their end-users.

Moderated by ebrary CEO Christopher Warnock, the panel includes Xan Arch, Electronic Resources and Technology Librarian at Stanford University; Caroline Crouse, Electronic Resources Librarian at George Washington University; Kat McGrath, Serials Librarian at the University of British Columbia; and Kristen Anderson, Collection Development Librarian at the University of Hawaii at Manoa.

“We are honored to have been selected by ER&L to conduct the E-book Think Tank and grateful to the well-respected librarians who have agreed to participate,” said Warnock. “As part of our mission to evolve the information experience, we look forward to discussing some of the issues that libraries face when integrating electronic content into their libraries from acquisition to the patron experience.”

**About ebrary ([www.ebrary.com](http://www.ebrary.com))**

ebrary® is a leading provider of e-content services and technology. The company helps libraries, publishers, and other organizations disseminate valuable information to end-users, while improving end-user research and document interaction.

The company has developed a flexible e-content platform, which customers may use in a number of different, integrated capacities: ebrary customers may purchase or subscribe to e-books and other content under a variety of pricing and access models, and they may license the ebrary platform to distribute, sell, and market their own content online. All options are delivered using a customizable interface and include a choice of ebrary Readers with QuickView™ for instant viewing in a browser and InfoTools™ software which provide contextual searching and integration with multiple online resources.

ebrary currently offers a growing selection of more than 170,000 e-books and other titles from more than 300 leading publishers and aggregators.

Founded in 1999, ebrary is privately held and is headquartered in Palo Alto, CA, USA.
