

ebrary Announces New SaaS for Government Documents

New service turns disparate PDFs into searchable, integrated databases

April 6, 2010 – Palo Alto, CA – ebrary®, a leading provider of digital content products and technologies, today announced the availability of Software as a Service (SaaS) for governments that makes information much more discoverable. With ebrary's SaaS, agencies, institutes, and centers can transform any PDF documents into searchable, highly interactive databases that can be integrated into master sites, providing a seamless way for end-users to find the important information they need online.

“Government websites contain some of the world's most important information, but it is not always easy to find the information you need without having to navigate through numerous departmental websites. At the same time, it is nearly impossible to search across the full text of the many PDF documents found on a large number of government sites,” said Kevin Sayar, President of ebrary. “ebrary believes that our technology can help solve this problem, and we look forward to helping governments better serve the public by making information more discoverable.”

ebrary will be debuting its new SaaS for government documents at Computers in Libraries, April 12-14, 2010 in Arlington, VA (booth #817). To see how ebrary's technology works, visit ebrary's complimentary Natural Disaster and Extreme Weather Searchable Information Center, which contains hundreds of government documents, at <http://disaster.ebrary.com> and ebrary's H1N1 Searchable Information Center at <http://h1n1.ebrary.com>.

Key Features and Benefits of ebrary's SaaS for Government Documents:

- Ability to seamlessly integrate multiple databases – Each department can maintain its identity and integrate information from other relevant sources.
- Capable of processing thousands of documents a day
- Multiple options for searching, navigating, and browsing
- ebrary InfoTools™, which turns every word into a portal to additional information on the web
- Notes and highlights
- Ability to copy/paste and print text with automatic citations and URL hyperlinks back to the source
- Personal bookshelves with moveable folders that can be emailed to others
- Comprehensive usage statistics
- No Reader required with QuickView.

About ebrary (www.ebrary.com)

ebrary helps libraries, corporations, publishers, and consumers get the most out of their digital content. The company offers a growing selection of more than 170,000 digital books, handbooks, reports, maps, journals and other valuable content from over 425 of the world's leading publishers under flexible subscription, purchase, and usage-based models. Additionally, ebrary offers content services—DASH! (do-it-yourself), Software as a Service (SaaS) and licensed—for customers to cost-effectively distribute their own PDF content online.

All ebrary products and services can be integrated and delivered via a single easy-to-use interface that includes powerful tools for finding, discovering, and managing information. With ebrary InfoTools™, every word in the ebrary system is a network to other online resources of the customer's choice, extending content value while increasing end-user knowledge and efficiencies.

Founded in 1999, ebrary is privately held and is headquartered in Palo Alto, CA, USA.
