

ebrary Launches New E-Book Subscription Databases for Schools and Public Libraries

March 25, 2010 – Palo Alto, CA – ebrary®, a leading provider of digital content products and technologies, today announced a new School Collection featuring more than 6,600 e-books and other authoritative titles from leading publishers. Created by a librarian, the new subscription collection provides simultaneous, multi-user access to content designed specifically for young adults in high schools, vocational schools, and college preparatory academies, as well as the public libraries that serve them.

Additionally, ebrary's long-time partner, e-Libro, has recently launched e-Libro Secundaria, a Spanish-language e-book subscription database powered by ebrary that can supplement ebrary's School Collection or be licensed separately.

ebrary also enables school administrators, teachers, librarians, and other staff to better enhance student learning with packages in Education, Psychology, Special Needs, and other areas of professional development, as well as a growing catalog of more than 160,000 titles for individual purchase.

"We are very excited to extend our product line to school libraries as well as public libraries, and to help them better meet the challenges of serving their entire campus community in this time of reduced library budgets," said Kevin Sayar, President of ebrary. "With these new collections, libraries can affordably offer an instant digital library covering subject areas important to both school curriculum and staff development, as well as powerful research tools that help students, teachers, and others quickly find and use the information they need."

ebrary's School Collection may be previewed at <http://tinyurl.com/ebraryschool>, and e-Libro Secundaria may be previewed at <http://tinyurl.com/elibrosecundaria>. For additional ebrary collections, please visit <http://site.ebrary.com/lib/schooltitles>.

Key features and benefits of ebrary's subscription databases:

- Simultaneous, multi-user access—anytime, anywhere
- Continued growth at no additional cost during the subscription
- Granular usage statistics
- Free records for the library catalog
- 24/7 online training with a live person
- Supplement with additional content, including newly published titles from Britannica, Facts on File, and many others
- Copy and paste, and print with automatic citations
- Highlight and annotate in multiple colors
- Save research in personal bookshelves and share with others—great for group projects
- Text-to-speech and other features for patrons with special needs
- InfoTools links every word with other online resources, allowing users to easily find additional information in the library catalog and other databases

Pricing and Availability

ebrary's School Collection and e-Libro Secundaria are available today. Librarians and others may request a demonstration by signing up at <http://www.surveymonkey.com/s/ebraryschooldemo> or emailing sales@ebrary.com. Discounts are available for school districts and public library systems.

About ebrary (www.ebrary.com)

ebrary helps libraries, corporations, publishers, and consumers get the most out of their digital content. The company offers a growing selection of more than 170,000 digital books, handbooks, reports, maps, journals and other valuable content from over 425 of the world's leading publishers under flexible subscription, purchase, and usage-based models. Additionally, ebrary offers content services—DASH! (do-it-yourself), Software as a Service (SaaS) and licensed—for customers to cost-effectively distribute their own PDF content online.

All ebrary products and services can be integrated and delivered via a single easy-to-use interface that includes powerful tools for finding, discovering, and managing information. With ebrary InfoTools™,

Knowledge Unbound.

Press Release

every word in the ebrary system is a network to other online resources of the customer's choice, extending content value while increasing end-user knowledge and efficiencies.

Founded in 1999, ebrary is privately held and is headquartered in Palo Alto, CA, USA.
