PennWell's Oil and Gas E-books Now Available through ebrary

December 16, 2009—Tulsa, OK—PennWell Corporation, a highly diversified media and information company, announced today that it has partnered with ebrary®, a leading provider of digital content products and technologies, to make authoritative information from its well-known selection of oil and gas e-books available online for the first time. Corporations in petroleum, power, and related industries may now make it easier for employees to find, use, and manage the information they need online.

“Through our partnership with ebrary, scientists and engineers can now access authoritative e-books any time, anywhere, as well as take advantage of ebrary’s superior research tools that increase productivity and efficiency,” said Mary McGee, Director of Information Products Group at PennWell. “We are excited to make ebrary’s flexible, powerful technology available to our customers, providing them with a competitive advantage in these tough economic times.”

“PennWell has been providing comprehensive coverage of the oil and gas industries since they were founded in 1910,” said Leslie Lees, Vice President of Content Development at ebrary. “As the world’s energy needs grow, access to timely information on power and related topics will become increasingly important. We are proud to be the first e-book provider to offer PennWell’s highly regarded titles in these areas to corporations and other organizations around the world.”

Available today, corporations may subscribe to the entire PennWell collection with unlimited organization-wide access and new titles added at no additional cost, or purchase different packages to meet their needs. The selection may be previewed at <http://tinyurl.com/pennwell>.

- Petroleum (69 titles)—Addresses the technology and business of the petroleum industry, from upstream to downstream. Topics include basic petroleum, business, exploration, logging, drilling, reservoir engineering, production, offshore, machinery, pipeline, and refining.

- **Electric Power (44 titles)**—Provides both detailed overviews of how electricity is generated, transmitted and distributed, as well as specific technology and industry trends. Topics include electric power basics, business issues, deregulation, generation, transmission and distribution, and natural gas.
- **Fire Service (56 titles)**—Features materials that the modern fire service needs to train and operate properly, from basic firefighting to managing the departmental budget. Topics include strategy and tactics, safety and risk management, management, technical rescue, career/advancement, apparatus/hydraulics, EMS, hazardous materials, training, public education/information, and investigations.

Powerful Technology Makes Research Quick and Easy

All PennWell titles are delivered via ebrary's easy-to-use interface and include sophisticated technology that makes it easy to pinpoint and manage relevant information from multiple sources within the organization and on the web. With InfoTools, scientists and engineers can select words of interest in a PennWell e-book, and automatically link to additional statistics, regulations, process charts, and other information within the collection and other online resources. Additionally, personal bookshelves make storing, managing, and sharing highlights, notes, and hyperlinks quick and efficient. More information about ebrary's technology is available at <http://www.ebrary.com/corp/corporationsFeatures.jsp>.

Pricing and Availability

PennWell's oil and gas collections are available through ebrary today. Librarians, knowledge managers, information professionals, and others may request a title list, demo, trial, or other information at <http://www.ebrary.com/corp/inforequest/pennwell.jsp>.
