

ebrary Announces New QuickView Functionality

April 26, 2010 – Palo Alto, CA – ebrary® customers throughout the world now have a quicker and easier way to discover information within e-books and other authoritative documents without having to download or install software. ebrary, a leading provider of digital content products and technologies, today announced it has added significant capabilities to QuickView™.

“With the latest advancements and accessibility in web infrastructures over the past decade, we are proud to reach the point where customers no longer require a ‘plug-in,’ or downloaded software to take advantage of our key functionality—ebrary is now available through any ‘modern’ web browser, on any computer operating system, mobile computing platform, or web-enabled device including greatly anticipated tablet computers such as the Apple iPad and the upcoming HP Slate,” said Christopher Warnock, CEO of ebrary. “Furthermore, we intend to continually enhance QuickView to offer greater capabilities for all types of digital content, produced by our growing roster of over 425 publishing partners to original works created by our customers and their end-users.”

New QuickView features include the following:

- Ability to customize InfoTools™, which turns every word into a portal to additional information, with online resources of the customer’s choice
- Print an entire chapter at a time (up to session limits)
- Choice of four citation preferences
- Navigate to the previous or next page by double-clicking on the document
- Ability to select text and navigate throughout documents by finger swiping on the iPad and iPhone
- Enable RefWorks, EndNote or both at the institution level

Additionally, end-users can easily share ebrary citations with peers at other institutions. Anyone who clicks on the URL to an ebrary title is automatically directed to the same document in their library’s ebrary collection (if available).

Knowledge Unbound.

Press Release

Libraries, corporations, and other organizations interested in seeing ebrary's new features can sign up for a demonstration at <http://www.surveymonkey.com/s/qvinfoools> or email ebtrain@ebrary.com.

About ebrary (www.ebrary.com)

ebrary helps libraries, corporations, publishers, and consumers get the most out of their digital content. The company offers a growing selection of more than 170,000 digital books, handbooks, reports, maps, journals and other valuable content from over 425 of the world's leading publishers under flexible subscription, purchase, and usage-based models. Additionally, ebrary offers content services—DASH! (do-it-yourself), Software as a Service (SaaS) and licensed—for customers to cost-effectively distribute their own PDF content online.

All ebrary products and services can be integrated and delivered via a single easy-to-use interface that includes powerful tools for finding, discovering, and managing information. With ebrary InfoTools™, every word in the ebrary system is a network to other online resources of the customer's choice, extending content value while increasing end-user knowledge and efficiencies.

Founded in 1999, ebrary is privately held and is headquartered in Palo Alto, CA, USA.
