ebrary Announces Technology Enhancements

March 11, 2008 – Palo Alto, CA – ebrary®, a leading provider of e-content services and technology, today announced several significant improvements to its hosted e-content system used by thousands of libraries, publishers, and other content producers serving more than 12.5 million end-users worldwide. All ebrary customers can now benefit from improved search, a more functional table of contents, and faster delivery time of purchased titles.

“ebrary continues to enhance our product and develop new features based on input from our customers,” said Christopher Warnock, CEO of ebrary. “These new capabilities mark the first of many new and improved features that ebrary will be launching this year to better serve the needs of our end-users.”

Available today, key enhancements include the following:

- Significantly improved search performance – Search results are faster and more precise.
- More functional table of contents – End-users may now access the table of contents without opening the actual document. Additionally, chapters are ranked by occurrences of a search term, making it easy for end-users to quickly and easily find the information they need.
- Faster delivery time of purchased titles – Librarians and organizations that purchase perpetual access titles through ebrary directly or through its distribution partners YBP and Blackwell will have nearly instant access to those titles. New titles will be integrated with a customer’s existing ebrary product with full-text searching and full ebrary functionality.

About ebrary (www.ebrary.com)

ebrary® is a leading provider of e-content services and technology. The company helps libraries, publishers, and other organizations disseminate valuable information to end users, while improving their research and document interaction.

The company has developed a flexible e-content platform, which customers may use in a number of different, integrated capacities: ebrary customers may purchase or subscribe to e-books and other content under a variety of pricing and access models, and they may license the ebrary platform to distribute, sell, and market their own content online. All options are delivered using a customizable interface and include the ebrary Reader™ with InfoTools™ software, which enable integration with other resources to provide an economical and efficient way to utilize information.

ebrary currently offers a growing selection of more than 170,000 e-books and other titles from more than 290 leading publishers and aggregators.

Founded in 1999, ebrary is privately held and is headquartered in Palo Alto, CA.
